

THUNDER BAY
**TREE STEWARDSHIP
PROGRAM**

DONATIONS & GRANTS

One third of new tree costs will come from sources which may include government grants, private sector donations, environmental funding initiatives and charitable donations. The success of the program depends more on this type of funding than any other.

THE CITY OF THUNDER BAY

One third of new tree costs will be covered by the City of Thunder Bay out of their tree planting budget.

HOME & BUSINESS OWNERS

A Thunder Bay resident will be required to cover one third of the cost of a new tree, about \$125. This is ideal for many individuals who don't mind contributing a portion of a tree's normal cost to have it planted within the year. They can choose to invest in a tree in front of their house, or they can invest in trees for their whole street or a nearby park.
